

Installation Instructions

Jumper Bar & Washer Set For Fusebox Input

Terminals

These instructions show how to assemble the Jumper Bar & Washer Set (product code P02090) to fuse boxes with product codes P01270 & P00604

Removal of existing fixings

The fuse boxes will be supplied with 4 x nuts and 4 x spring washers as shown in the image 1. These must be removed before fitting the jumper bar and washers.

Image 1

Assembly of Jumper Bar & Washers

The tinned copper washers must be fitted first, followed by the jumper bar and then the cable terminal, as shown in Image 2. The original spring washers and nuts should be re-fitted last.

IMPORTANT – the tinned copper washers must be fitted underneath the jumper bar to ensure good electrical contact with the fuse box busbars.
