System Information

## TIPS

1. Please install the latest version App.
2. Android phone required the bluetooth4.0 with BLE(bluetooth low energy) function.  
The APP only support “one to one” mode. (the bluetooth hardware feature)
3. The APP only for TOPBAND lithium battery, can't not connect phone/tablet/or others device.
4. Please make sure the battery have enough energy and can run normally.
5. If you want to use other phone to connect the same battery, please exit the app first.

“Any further using problem, please contact us for the professional help.”
